### Entrepreneur Development Cell

The Entrepreneurship Development Cell (EDC) was started with the object of promoting specialized knowledge in the field of entrepreneurship development. In view of the worldwide shortage of jobs (both government and private sectors) leading to unemployment problems and lack of proper utilization of human resources; the cell strives to identify talented youth to entrepreneurial works. The cell plans to organize various programmes regarding entrepreneurship development.

#### **Functions:**

- To conduct skill development training programmes leading to self-employment.
- To create an environment for self-employment and entrepreneurship development.
- Through formal and non-formal procedures.
- To create awareness on entrepreneurship among the students.
- To identify and motivate budding entrepreneurs.
- To facilitate and extend various informational services related to promotion of entrepreneurship.
- Guide and assist potential entrepreneurs in the process of setting up, growing and managing the new venture.
- Arrange guest lectures by successful entrepreneurs and provide a platform for interaction between professional entrepreneurs and student entrepreneurs.
- Organize faculty development programmes to sensitize the faculty members in the college regarding the importance of entrepreneurship in real life, corporate life and economic development of the country.

Certified that I have satisfied myself that the conditions on which grants were sanctioned have been duly fulfilled/are being fulfilled and that I have exercised following checks to see that the money has been actually utilized for the purpose for which it was sanctioned:

- (i) The main accounts and other subsidiary accounts and registers (including assets registers) are maintained as prescribed in the relevant Act/Rules/Standing instructions (mentioned the Act/Rules) and have been duly audited by designated auditors. The figures depicted above tally with the audited figures mentioned in financial statements/accounts.
- (ii) There exist internal controls for safeguarding public funds/assets, watching outcomes and achievements of physical targets against the financial inputs, ensuring quality in asset creation etc. & the periodic evaluation of internal controls is exercised to ensure their effectiveness.
- (iii) To the best of our knowledge and belief, no transactions have been entered that are in violation of relevant Act/Rules/Standing instructions and scheme guidance.
- (iv) The responsibilities among the key functionaries for execution of the scheme have been assigned in clear terms and are not general in nature.
- (v) The benefits were extended to the intended beneficiaries and only such areas/districts were covered where the scheme was intended to operate.
- (vi) The expenditure on various components of the scheme was in the proportions authorized as per the scheme guidelines and terms and conditions of the grants-in-aid.
- (vii) It has been ensured that the physical and financial performance under ..... (name of the scheme has been according to the requirements, as prescribed in the guidelines issued by Govt. of India and the performance/targets achieved statement for the year to which the utilization of the fund resulted in outcomes given at Annexure – I duly enclosed.
- (viii) The utilization of the fund resulted in outcomes given at Annexure – II duly enclosed (to be formulated by the Ministry/Department concerned as per their requirements/specifications.)
- (ix) Details of various schemes executed by the agency through grants-in-aid received from the same Ministry or from other Ministries is enclosed at Annexure – II (to be formulated by the Ministry/Department concerned as per their requirements/specifications).

DST - NIMAT PROJECT 2019 - 20

Implemented by:  
Entrepreneurship Development Institute of India (EDII), Ahmedabad

Under the aegis of:  
The National Science & Technology Entrepreneurship Development Board, DST, Govt. of India

Agreement between EDII and Programme Implementing Agency (PIA)

Entrepreneurship Development Institute of India (hereinafter referred to as EDII) having its Head Office at Village & P.O. Bhar 382 428, Dist. Gandhinagar (Gujarat) and  
ESWAR COLLEGE OF ENGINEERING, KESANURPALLI VILLAGE, NARASARAOPET  
529 549

(Name & address of the Programme Implementing Agency (PIA)) hereby enter into the following Agreement on 26/08/2019 (Date) at NARASARAOPET (Place)

ESWAR COLLEGE OF ENGINEERING (Name of the PIA) has agreed to conduct 2 EAC(s) / — EDP(s) / — WEDP(s) / — TEDP(s) / — FDP(s). The programme (s) / activity are to be conducted as per the terms and conditions enclosed.

General Guidelines

1. The grant being released should be exclusively spent on the specified purpose for which it has been sanctioned within stipulated time. Any unspent balance out of the amount sanctioned would be surrendered to EDII, Ahmedabad. Carry forward of unspent funds to the next financial year for utilisation for the same purpose may be considered only with the specific approval of the EDII, Ahmedabad.
2. The Programme Implementing Agency will furnish progress report of the work on the programme from time to time. In addition, appropriate persons may visit the Programme Implementing Agency periodically for ascertaining the progress of work and resolve any difficulties that might be encountered in the course of implementation. During the progress of the project, the PIA will provide all facilities to the Visiting Persons. On completion of the programme, consolidated report of the work done on the subject in a bond form shall be sent to EDII, Ahmedabad.
3. The Programme Implementing Agency shall furnish to EDII, Ahmedabad, Utilisation Certificates (copy enclosed) and an Audited Statement of Accounts pertaining to the grant within three months of completion of the programme / activity sanctioned.
4. The Programme Implementing Agency will maintain separate audited accounts for this project. If it is found expedient to keep a part or whole of the grant in a bank account earning interest, the interest earned should be reported to the EDII, Ahmedabad. The interest thus earned will be treated as a credit to the PIA and the same to be refunded to NSTEDB through EDII.
5. The Programme Implementing Agency will not outsource the work for which the grant is being sanctioned. In case the PIA itself is not in a position to execute or complete the project, it would be required to refund the entire amount of grant-in-aid received by it to EDII, Ahmedabad.

## INTRODUCTION TO INTELLECTUAL PROPERTY RIGHTS

### CONCEPT OF INTELLECTUAL PROPERTY:

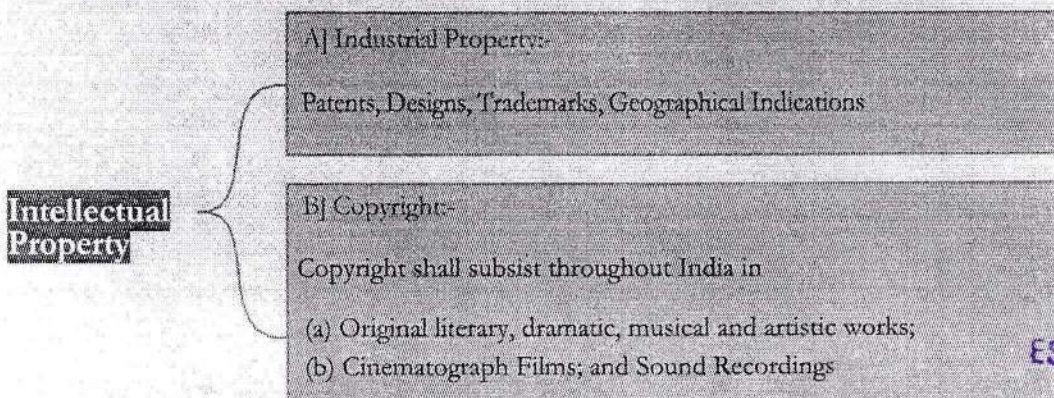

Intellectual Property means the property represented by the product/process emanating from creativity of the human mind, human intellect and creative ideas. It can be an Invention, original Design, Trademarks, artistic creation etc. In earlier times, physical or tangible assets like movable and immovable properties fetched the maximum value and the owner had an exclusive right over it. With the passage of time, new ideas cropped in, new concepts and means for the progress of mankind were thought of & new inventions came to the forefront, which brought about industrial, economical and cultural development in the society.

These new activities acquired the form of intangible assets owing to the inherent and practical values associated with them. Therefore, another form of property right was generated which required safeguarding for the owners of those properties. The property right, pertaining to such intangible assets, is called Intellectual Property Rights, popularly known as IPR. It share many of the characteristics associated with conventional concept of the personal property.

The intellectual property is an asset and, as such, it can be bought, sold, mortgaged, licensed, exchanged or gratuitously given away like any other form of the property. Further, by acquiring a legal right over the property, the creator of the intellectual property seeks to ensure that he has exclusive right over it and that the property can be put to use by others only with his consent. Besides, ownership of Intellectual Property Right is the legal recognition and reward you receive for your creative efforts, in the context of global market scenario.

### TYPES OF INTELLECTUAL PROPERTY:

Intellectual Property Rights can be broadly divided into two categories: -

Industrial property mainly consists of Patents, Designs and Trade Marks and Geographical Indications.

- Patents are granted for inventions
- Designs for creations determining the aesthetic appearance of products / articles.
- The trademarks indicate the origin of goods or services and also enable customers to distinguish the goods and services of one trader from those of other, whereas
- Geographical Indication is issued for products that originate from a specific geographical area and possess characteristics, qualities or reputation that are due to that origin
- Copyright relates to artistic and literary creation such as poem, novel, painting, computer software etc. In recent times, the term Intellectual Property is used to include other forms, such as, plant variety, integrated circuits etc.

## PATENTS

Patent is an exclusive right granted by the Government to the applicant for his disclosed invention of industrial product or process which should be new, non-obvious, useful and patentable as per the patentability criteria laid down in the national law. A patent offers technical solution to a technical problem. In lieu of disclosure of invention, the Government provides legal protection to the inventions for a limited term for applicant's invention. Patents rights can be transfer from inventor to applicant via assignments. The Government gives the territorial right for the invention in the country where it is granted.

### IMPORTANCE OF PATENT RIGHTS

- Patent right is granted for a limited period of time i.e. 20 years from the date of filing. It gives territorial right, exclusive right and can be enforced only in the country where it has been granted.
- The patent right may enables the patentee to derive material benefit, to which he/she is entitled, as a reward for his intellectual efforts and compensation / royalty for expenses incurred in research and experimentation relating to his invention.
- Patent right gives protection against infringement and creates possibility of assigning or licensing of the right and enables the patentee to take legal action against any person who is exploiting/infringing the patented invention without consent or license from the patentee. A patentee acquires the right, enforceable by law, to decide who shall use and who shall not use his patented invention. Patentee retains this right for the term of the patent provided applicant pays the necessary renewal fees.
- The grant of patent right by the government does not mean that the government itself would automatically enforce the patent right. It is up to the patentee/assignee to bring an action, usually under civil law, for any infringement of the patent right

## INDUSTRIAL DESIGNS

Design means only the features of shape, configuration, pattern, ornament or composition of lines or colors.

- It must be applied to any article, whether two dimensional or three dimensional or in both forms, by any industrial process or means, which in the finished article appeal to and are judged solely by the eye.
- Such a design is registerable, provided it is new or original and not contrary to public order or morality or does not contain obscene or scandalous matter.

### BENEFITS OF REGISTRATION OF INDUSTRIAL DESIGNS:

- Registration of a design confers upon the registered proprietor the exclusive right to apply a design to the article in a class in which the design has been registered
- Industrial Designs are of great commercial value because design of the article can often be a unique selling point. When companies are competing at equal price and functionality, Design is the differential that matters for achieving market advantage and competitiveness.
- When a Design registered, the registered proprietor of the design shall have copyright in the design during ten years from the date of application, which can further extended another five years. Total term of design is fifteen years (with extension).

### DESIGNS IMPORTANT POINTS:

- Design must be New or Original
- Design is for beautifying an article to attract consumer. Design must be applied to an article
- Design in finished article should appeal to eye means the design features must be noticeable in the finished article (E.g, Detergent powder cannot be judged)
- Article means any article of manufacture and any substance artificial, or partly artificial and partly natural: and includes any part of article capable of being made and sold separately

## TRADEMARKS

A Trade Mark is a word, name, logo, label etc., which indicate the origin of goods and services and enable customers to distinguish the goods and services of one trader from the goods of the other.

### BENEFITS OF TRADEMARK:

- When properly advertised, the Trade Mark becomes an effective instrument to attract the customers and acquire goodwill of the customer.
- A Trade Mark, through its widespread and extensive use in public, becomes popular and eventually results in acquiring an exclusive right, which can be legally enforced by the owner of the mark.
- Trade Mark helps the consumer to answer the question, "who makes the product or who has provided the service?" e.g. COCA COLA, SONY, TVS, etc.

Bisleri

### COLLECTIVE MARKS:

These are the marks which distinguish the goods or services of members of an Association which is the proprietor TM from those of the others.

### SERVICE MARKS:

When a Trade Mark is used in connection with services, it is called a "Service Mark". e.g. service like Hotels, restaurants, Airlines, Tourist agencies, Laundries and Cleaners etc.

## GEOGRAPHICAL INDICATION

- Geographical Indication refers to any indication that identifies the goods as originating from a particular place, where a given quality, reputation or other characteristics of the goods is essentially attributable to its geographical origin. e.g., Darjeeling Tea, Basmati Rice, Kanchipuram silk, Nagpur oranges, Makrana marble, Blue Pottery of Jaipur, etc
- To ascertain whether product qualifies as a Geographical Indications? It should conform to five main parameters: 1. Originating from a particular Geographical Area; 2. Linkage with Geography and the product (Direct / Indirect); 3. Reputation of the Product (Local / National / International); 4. Historical Origin; 5. Uniqueness and Quality of the product.
- In India, registration and protection of Geographical Indications is restricted to Goods only and Further "Goods" are divided into three main categories i.e., agricultural, natural and manufactured goods. Manufactured goods is further, sub-categories as Handicraft which includes Handloom, Textiles, goods of Industry or Industrial goods, food stuff & wines & spirits.

### BENEFITS OF GEOGRAPHICAL INDICATION:

- GI confers legal protection to geographical indications in India and prevents unauthorized use of a registered geographical indication by others.
- It boosts exports of Indian geographical indications by providing legal protection. It promotes economic prosperity of producers of goods produced in geographical territory.

## COPYRIGHTS

- Copyright is protection that covers published and unpublished literary, scientific and artistic work. Copyright relates to the exclusive right to do or authorize to do certain acts in relation to original literary, dramatic or musical work, artistic creations (paintings, photographs, work of architecture, artistic craftsmanship) cinematographic films, sound recording, software programme etc, provided such works are fixed in a tangible or material form.
  - Copyright comes into existence as soon as the work is created and protects skill & labour employed by the creator in production of his work. The term varies according to the nature of the work.
  - Copyright is not given for just an idea, but subsists only in the material form to which the ideas are translated or expressed.
  - No copyright for a person who merely communicates his brilliant idea to an artist or play writer. The production i.e. the result of communication of the idea, is the copyright of a person, who has fixed the idea in a form. The author has no monopoly in the ideas or subject matter; others can produce the same result and can have a copyright provided they do it independently. It is a Bundle of Rights and can be exercised independently of each other.
  - Unauthorized copying or reproduction of the author's work amounts to infringement. But, a fair dealing with the work for private uses i.e. study, research, review, criticism etc, without an intention of commercial gain is not an infringement.
- The Copyright Act, 1957 (the 'Act') came into effect from January 1958. The Act has been amended five times since then, i.e., in 1983, 1984, 1992, 1994, 1999 and 2012. The main reasons for amendments to the Copyright Act, 1957 include to bring the Act in conformity with two WIPO internet treaties concluded in 1996 namely, the WIPO Copyright Treaty ("WCT") and WIPO Performances and Phonograms Treaty ("WPPT") to protect the Music and Film Industry and address its concerns; to address the concerns of the physically disabled and to protect the interests of the author of any work; Incidental changes; to remove operational facilities; and enforcement of rights. Some of the important amendments to the Copyright Act in 2012 are extension of copyright protection in the digital environment such as penalties for circumvention of technological protection measures and rights management information, and liability of internet service provider and introduction of statutory licenses for cover versions and broadcasting organizations; ensuring right to receive royalties for authors, and music composers, exclusive economic and moral rights to performers, equal membership rights in copyright societies for authors and other right owners and exception of copyrights for physically disabled to access any works.

### Why should copyright be protected?

Copyright ensures certain minimum safeguards of the rights of authors over their creations, thereby protecting and rewarding creativity. Creativity being the keystone of progress, no civilized society can afford to ignore the basic requirement of encouraging the same. Economic and social development of a society is dependent on creativity. The protection provided by copyright to the efforts of writers, artists, designers, dramatists, musicians, architects and producers of sound recordings, cinematograph films and computer software, creates an atmosphere conducive to creativity, which induces them to create more and motivates others to create.

"Semiconductor Integrated Circuit (SIC)" means a product having transistors and other circuitry elements, which are inseparably formed on or inside a semiconductor material or an insulating material and designed to perform an electronic circuitry function.

Also called chip or microchip, these IC chips form an integral part of every electronic device like computers and processors, television, electronic watch, mobile phones, CNC machines etc. SICs are fabricated from a complex series of semiconductor layers, dielectrics and other circuit elements interconnected on a substrate. The layout-design of a semiconductor integrated circuit (SICLD) means a layout of the arrangement of transistors and other circuitry elements interconnected and expressed on a semiconductor integrated circuit.

### SICLD and SICLD REGISTRY

- Semiconductor Integrated Circuit Layout-Design (SICLD) Registry: Statutory body under Office of the CGPDTM.
- SICLD or SIC topography is an IPR governed by SICLD Act, 2000 and SICLD Rules, 2001.
- Easy to file and process - Only few documents and the layout-design in a suitable format are required with filing fees.
- The criteria for registration of an integrated circuit layout design are that it should be:
  - Original,
  - Distinctive,
  - Capable of being distinguishable from any other layout design,
  - Have not been commercially exploited anywhere in India or in a convention country.
- A creator of a layout design who is an Indian national or national of a country outside India, which accords to citizens of India similar protection and has principal place of business in India or if he does not carry out business in India has place of service in India, can apply for registration.
- Any opposition to the advertisement can be filed within 3 months from the date of advertisement. The counter-statement to the notice of opposition, if any, to be filed within 2 months from the date of receipt of copy of notice of opposition from the Registrar, subsequent to which hearing is conducted before decision.
- The Registrar will decide on the registrability of the layout-design and register or reject the application for registration based on the facts and evaluation
- Provisions of correction, amendment, rectification and cancellation et al of SICLDs are present in the law.
- Assignments and transmissions of rights of a layout design can be made.
- Infringement of a registered layout-design or any falsification may attract penal actions.

The registration of a layout-design shall be only for a period of ten years counted from the date of filing an application for registration or from the date of first commercial exploitation anywhere in India or in any country whichever is earlier.
